

Maintenance Drugs

Maintenance drugs are used on a continuing basis for the treatment of chronic conditions. Select health plans require that pharmacy benefit maintenance drugs are filled at Kaiser Permanente Washington Mail Order or Kaiser Permanente Clinic Pharmacies for ongoing health plan coverage. Please consult your Evidence of Coverage or call Member Services at 1-888-901-4636 if you have questions about your drug coverage.

Non-maintenance drugs are generally used for episodic treatment, are considered narrow therapeutic index by Kaiser Permanente Washington, or are schedule 2 controlled substances. Non-maintenance products include: opioids, opioid reversal agents, opioid dependence agents, benzodiazepines, skeletal muscle relaxants, schedule 2 stimulants, vaccines, oral antibiotics, antiemetics, cough/cold/allergy products, emergency contraception, epinephrine pens, bowel preparations, smoking cessation, prednisone, enoxaparin, cyclosporine, digoxin, dofetilide, everolimus, lithium, mycophenolate, sirolimus, sotalol, tacrolimus, theophylline, and warfarin.

The maintenance drug list below is not comprehensive and is subject to change without prior notification. Coverage is provided by Kaiser Permanente Health Plan of Washington and Kaiser Permanente Health Plan of Washington Options, Inc.
